

BioScience Center Second Floor Build-out

Project Summary

Cost: \$1.9M

Status: Complete

Completion Date: December 2012

Project Contacts

Executive Architect: Pacific Cornerstone Architects

Design-Build Contractor: -Turner Construction

Project Manager: Quan Lee

Project Description

This project completes the Second Floor build-out, of the Donald P. Shiley BioScience Center, a four-story 37,000 SQF facility dedicated to leading edge biological research.

The initial 2006 construction project completed the building envelope, the basement, the first and fourth floors. Build-out of the third floor was completed with a subsequent project. This Second Floor project will develop the remaining space to provide BSL2 safety level research labs for sponsored faculty projects in tissue culture.

See the [SDSU BioScience](#) web site for details.
