

MEMORANDUM

To: Laura Shinn, San Diego State University
From: Glenna McMahon, Dan Ritter, Dudek
cc: Sarah Lozano, Katie Laybourn, Dudek
Subject: SDSU Tula Pavilion and Tenochca Hall Renewal/Refresh - Hazards
Technical Memorandum
Date: January 4, 2017
Attachment(s): Figure 1 – Project Location and Vicinity Map
Figure 2 – Project Site
Appendix A – EDR Radius Map Report
Appendix B – Aerial Photographs
Appendix C – Topographic Maps
Appendix D – Certified Sanborn Map Report

Dudek evaluated potential impacts to hazardous materials associated with the proposed San Diego State University (SDSU) Tula Pavilion and Tenochca Hall Renewal/Refresh (proposed project), located in San Diego, California. This technical memorandum provides the results of that evaluation.

1 PROJECT LOCATION AND SETTING

SDSU is located adjacent to Interstate 8 (I-8), approximately 8 miles east of downtown San Diego (see Figure 1, Project Location and Vicinity Map). The SDSU campus is located in the “College Area,” within the City of San Diego (City) and County of San Diego, and is surrounded by urban uses, including commercial, institutional, and medical facilities. The proposed project would be located in the southeastern portion of the SDSU campus (see Figure 2, Project Site). As described below, the proposed Tenochca Community Space (TCS) and Tula Pavilion would replace the existing Tula/Tenochca Community Center; the TCS would be constructed on the site of the demolished Tula/Tenochca Community Center, and the proposed Tula Pavilion would be constructed to the northwest on the site of a paved walking path at the north end of a service vehicle parking lot.

2 PROJECT DESCRIPTION

The proposed project, referred to as the “Tula Pavilion and Tenochca Hall Renewal/Refresh,” involves demolishing the existing Tula/Tenochca Community Center and replacing it with two separate buildings, the Tula Pavilion and Tenochca Community Space (TCS). The proposed TCS would be two stories in height and approximately 13,000 gross square feet (gsf) in size. The proposed TCS building would provide a variety of student gathering spaces, including student lounges, a kitchen for student use, and areas visible to televisions that front the outdoor grounds. The proposed Tula Pavilion would be a one-story building and approximately 12,000 gsf. The Tula interior space would include one large assembly space, and an adjoining large classroom/seminar room that can be divided into three smaller rooms and a banquet room. On the exterior, a courtyard would provide an outdoor venue for private events, and otherwise would be open to public use and circulation.

In addition, the proposed TCS would be constructed at the site of the existing Tula/Tenochca Community Center and would replace the student common spaces at the existing Tula/Tenochca Community Center, such as the security check-in point, student lounge space, laundry and Star Center, and faculty residences. Exterior landscape improvements would include the expansion of the landscape at the commons side of the building. A new “Tenochca Backyard” would be created with outdoor room and lawn areas. The existing pool between the proposed TCS and existing Maya Hall would be enclosed with new fencing, surrounded by new palm trees, and furnished with new furniture and tables to create a sense of place at the pool deck. No further renovations to the pool area would be proposed as part of the project. Construction of the proposed TCS would require approximately 8,700 square feet (sf) of concrete and approximately 850 cubic yards (cy) of structural fill.

Further, the proposed Tula Pavilion would replace those spaces that serve public gathering and large assembly functions at the existing Tula/Tenochca Community Center and would be constructed north of the existing Tula/Tenochca Community Center on a site presently designated as Lot 4A. The proposed building would also incorporate exterior elements, including a courtyard on the north end and an open arcade that wraps around the west side of the building, for a total exterior space of approximately 6,000 sf. The proposed Tula Pavilion would be constructed as a steel-framed building with a wood roof, a reinforced concrete foundation system, and stucco exterior. Construction would require approximately 10,000 sf of concrete and approximately 2,000 cy of backfill.

The anticipated start date for demolition of the Tula/Tenochca Community Center and construction of the proposed Tula Pavilion and TCS is June 2017, with an anticipated duration for construction of 15 months. The total gsf to be demolished is approximately 20,000 gsf. The

Memorandum

Subject: Hazards Assessment for the SDSU Tula Pavilion and Tenochca Hall Renewal/Refresh

total gsf to be constructed is approximately 25,000 gsf of interior space. See Table 1 for additional project demolition and construction details.

Prior to demolition and construction, and during project design, a survey will be completed to determine the extent of any asbestos, lead-based paint and termiticides containing materials onsite. If asbestos, lead-based paint or termiticides are detected, a remediation plan will be prepared and implemented prior to construction in full compliance with all San Diego County Department of Environmental Health and EPA standards that dictate methods by which to safely remove and dispose of these hazardous substances. SDSU will also implement a Hazardous Material Contingency Plan that will outline how all project site-related hazardous materials are to be handled, stored, transported, and disposed of on or offsite. This will help prevent an emergency hazardous material situation from affecting the project site.

3 EXISTING CONDITIONS

3.1 Regulatory Records

In November 2016, Environmental Data Resources (EDR) conducted a search of regulatory records. The search was conducted according to the American Society for Testing and Materials

Memorandum

Subject: Hazards Assessment for the SDSU Tula Pavilion and Tenochca Hall Renewal/Refresh

(ASTM) Standard E 1527-13 using standard search radii, which are listed in the EDR report (Appendix A). The EDR report gives a listing of sites within a 1-mile radius of the proposed project site, which are known to be chemical handlers, hazardous waste generators, or polluters. Information in these listings includes the location of the impacted site relative to the proposed project site, sources of pollution, and the status of the impacted site.

The project site was not listed in any of the regulatory databases searched by EDR.

Thirty-one cases were identified within the ASTM-specified search distances of the proposed project site. However, several of these cases are multiple listings for the same address. If cases at the same address are grouped together, 17 unique addresses changed within the databases searched by EDR. Four of the cases identified by EDR are located greater than 0.5 mile from the proposed project, based on their distance from the proposed project site, these sites are unlikely to impact environmental conditions at the project site.

Five of the remaining cases were listed in regulatory databases that indicate that they were formerly the site of a dry cleaner or gas station. There is no information to indicate that these cases are associated with releases to soil or groundwater. As such, these cases likely have not impacted the environmental conditions at the project site.

Four of the remaining cases were located within 0.5 mile of the project site and listed in the CA Notify 65 database. This database is associated with permitting and does not indicate a release to soil or groundwater. There is no information to indicate that these cases have impacted the environmental conditions at the project site.

The remaining four addresses are located within 0.5 mile of the project site and have listings in multiple databases, including the Leaking Underground Storage Tank (LUST) database and the Spills, Leaks, Investigation, and Cleanup (SLIC) database. Other database listings for these addresses are associated with permitting and handling hazardous materials. Listings in the LUST and SLIC databases at each address are described as follows:

- College Arco (also reported as Obrien Pacific Inc., Chevron, and Edward Cramer) is located at 5111 College Avenue, approximately 473 feet west of the project site, and has four LUST listings and one SLIC listing. The first LUST case was a release of waste oil to soil that was discovered October 28, 1987. Contaminated soil was removed and replaced, and this case was closed in June 1990. The second LUST case was a release of waste oil found on June 5, 1990. Contaminated soil was removed, and the case was closed in July 1991. The third LUST case was a release of gasoline to groundwater in 1991. This case was closed in December 2001. No remedial action was listed for this

Memorandum

Subject: Hazards Assessment for the SDSU Tula Pavilion and Tenochca Hall Renewal/Refresh

case. The fourth LUST case was a release of gasoline to groundwater on May 31, 1991. The status of the site is listed as preliminary assessment underway. A review of a prior hazards assessment conducted for SDSU indicates that this release case has been closed (Dudek 2009). The SLIC case was a release of gasoline reported May 24, 1990. The potential media affected is not reported. The case was closed in June 1990. Groundwater flow at this site is reported as being to the west (Dudek 2009). As a result of the closed status of these sites, the media affected by releases, and the general direction of groundwater flow, it is unlikely that these releases have impacted environmental conditions at the project site.

- College Mobil Service (also reported as Former Mobil Station 18-EHB) is located at 5130 College Avenue, approximately 619 feet west of the project site, and has three LUST listings. The first LUST listing indicates multiple releases of waste oil to soil and gasoline to soil and groundwater. All of the reported releases have been investigated and closed by the lead agency. The second LUST case was a release of gasoline to groundwater. This case was investigated and closed by the lead regulatory agency. The third LUST case was reported as a release of gasoline to soil only. The status for this site is listed as preliminary site assessment underway. However, the prior hazards assessment conducted for SDSU indicates that this case has been remediated and closed (Dudek 2009). As a result of site closure and the media affected it, is unlikely that these releases have impacted environmental conditions at the project site.
- Unocal No. 3991 (also reported as Unocal) is located at 5140 College Avenue, approximately 726 feet west–northwest of the project site, and has two LUST listings and one SLIC listing. The first LUST listing is a release of gasoline to soil only reported in March 1995. The status is listed as preliminary site assessment underway. However, the prior hazards assessment conducted for SDSU indicates that this case has been remediated and closed (Dudek 2009). The second LUST listing is a release of gasoline to groundwater. This leak was reported as discovered in 1995, and the case was closed by the lead agency in 2005. The SLIC listing for the site has two closed listings and one open listing. The first closed listing was a release of gasoline that was investigated and closed in 1989. The second closed listing was a release of waste oil that was closed in 1995. The open listing does not specify a contaminant of concern. The site is listed as a Category 1 site on GeoTracker, which indicates that contamination does not pose an immediate threat to human health and contamination does not extend off site. Given the Category 1 listing, the location of this site relative to the project site, and the general southwestern direction of groundwater flow in the vicinity of the project site, it is unlikely that these releases have impacted environmental conditions at the project site.

Memorandum

Subject: Hazards Assessment for the SDSU Tula Pavilion and Tenochca Hall Renewal/Refresh

- The final two LUST listings are at 5500 Campanile Drive, located approximately 1407 feet west–northwest of the project site. These LUST listings contain several releases of gasoline and diesel to soil. All listed cases have been closed, with the most recent release occurring in 1998. Given the closure status, the media affected, and the distance of the releases from the project site, it is unlikely that these releases have affected environmental conditions at the project site.

No additional cases were identified within 0.5 mile of the project site in the EnviroStor or GeoTracker databases.

3.2 Aerial Photographs

Historical aerial photographs (Appendix B) were reviewed to determine if evidence of historical activities could present environmental concerns at the project site. Historical aerial photographs from 1949, 1953, 1964, 1966, 1970, 1979, 1985, 1989, 1995, 2005, 2009, 2010, and 2012 were reviewed. Observations are presented in Table 2.

Table 2
Historical Aerial Photograph Observations

Date	Description
1949	The project site appears to be undeveloped. Montezuma Road is visible to the south of the project site. Further south are graded vacant lots and what appear to be residential homes. The areas to the north and east are largely undeveloped. San Diego State University is visible to the west and northwest.
1953	Residential homes have been built on the graded lots south of Montezuma Road. The area immediately to the west of the project site appears to have been graded. Additional streets and residences have been built east of the project site.
1964	A parking lot has been constructed on the project site. Two buildings that appear to be residential halls for SDSU have been built directly west of the project site. The area to the north of the project site has been developed as a parking lot. The area immediately to the east of the project site is graded but undeveloped.
1966	The graded area to the east of the project site has been made into a parking lot. The rest of the project site and surrounding area appear similar to the 1964 photograph.
1970	Two new buildings are present immediately north and west of the project site. The rest of the project site and surrounding area appear similar to the 1966 photograph.
1979	More buildings are present on the San Diego State University campus to the north and northwest of the project site. The area immediately around the project site appears similar to the 1970 photograph.
1985	The Tula Community Center and Tenochca Hall buildings are present on the southern part of the project site. East Campus Drive has been constructed to the east of the project site, and construction of a parking garage is taking place to the east of the project site.
1989	The project site and surrounding areas are similar to the 1985 photograph. The parking structure to the east of the project site has been completed.
1995	The project site and surrounding area appear similar to the 1989 photograph.
2005	A second parking structure has been completed to the east of the project site. Buildings have replaced the parking lot immediately north of the project site. Additional buildings have been constructed along East Campus Drive adjacent to the project site.

Memorandum

Subject: Hazards Assessment for the SDSU Tula Pavilion and Tenochca Hall Renewal/Refresh

Table 2
Historical Aerial Photograph Observations

Date	Description
2009 2010 2012	The project site and surrounding areas appear similar to the 2005 photograph.

3.3 Topographic Maps

Historical topographic maps were obtained from EDR for the years 1903/1904, 1930, 1942/1944, 1947, 1953, 1967, 1975, 1994/1996, and 2012 (Appendix C). The topographic maps show the following information in Table 3.

Table 3
Topographic Maps Information

Date	Scale	Description
1903/ 1904	1:62,500	The project site is located south of Alvarado Canyon. The project site appears to be undeveloped. An undeveloped road is depicted just to the east of the project site.
1930	1:62,500	The project site remains undeveloped. Roads have been constructed to the south and west of the project site.
1942/ 1944	1:31,680	More roads and development are present in the vicinity of the project site. San Diego State University (labeled as State College) appears to the northwest of the project site.
1947	1:24,000	The project site and surrounding areas appear similar to the 1942/1944 topographic map.
1953	1:24,000	Montezuma Road appears as an improved road directly south of the project site. The areas immediately to the south, east, and west of the project site are depicted as part of the urban area of San Diego. The project site still appears to be undeveloped.
1967	1:24,000	Two buildings are present immediately to the west of the project site. Topographic contours on the project site indicate that it has been leveled, likely to build the parking lot shown in the aerial photographs. More buildings are present on the San Diego State University campus to the northwest of the project site.
1975	1:24,000	The project site and surrounding areas appear similar to the 1967 map.
1994/ 1996	1:24,000	The project site and surrounding areas are all depicted as being part of the urban area of San Diego. Campus Drive and another structure have been built east of the project site.
2012	1:24,000	The area of the project site is labeled as College Heights. There are no depictions of buildings or local landmarks on this topographic map. All the other features appear to be similar to the 1994/1996 topographic map.

3.4 Historical Sanborn Fire Insurance Maps

Historical Sanborn fire insurance map listings were requested from EDR. Sanborn maps provide information regarding the historical uses of the project site and surrounding properties. The Sanborn map report (Appendix D) identified the subject property as an unmapped property.

4 METHODOLOGY

The objective of the hazards assessment is to determine if the project site is listed in a regulatory database for hazardous materials/waste issues and/or if there have been any impacts to the project site due to current or past hazardous materials storage or use. This hazards assessment consisted of review and summary of the following information: regulatory agency records, historical aerial photographs, topographic maps, and records from online databases maintained by the Regional Water Quality Control Board (RWQCB; GeoTracker) and Department of Toxic Substances Control (DTSC; EnviroStor). Dudek conducted an evaluation of the hazards potential based on information in these databases, land uses that could generate hazardous conditions, and information contained on the aerial photographs, topographic maps and Sanborn Fire Insurance Maps, to determine the impacts, if any, to the project site or surrounding area.

5 IMPACT ANALYSIS AND CONCLUSIONS

5.1 Thresholds of Significance

The following thresholds of significance are based on Appendix G of the CEQA Guidelines. Based on these thresholds, implementation of the proposed project would have a significant adverse impact related to hazards and hazardous materials if it would:

- a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials;
- b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment;
- c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school;
- d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would create a significant hazard to the public or the environment;

- e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, result in a safety hazard for people residing or working in the project area;
- f. For a project within the vicinity of a private airstrip, result in a safety hazard for people residing or working in the project area;
- g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan; and
- h. Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands.

5.2 Impact Analysis

Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Construction/Temporary Impacts

During construction of the proposed project, a variety of hazardous materials would be stored, used, and generated on the proposed project site. Hazardous materials would include fuel for vehicles, new and used motor oils, cleaning solvents, and paints. If not properly treated, accidental spills, leaks, fires, explosions or pressure releases pose a potential threat to human health and the environment. During project construction, a potentially significant impact related to the unintended release of hazardous materials during routine transport, use, or disposal might occur. Prior to construction, all hazardous materials laws and regulations would be followed to alleviate any potential impacts to less than significant.

Due to the age of the buildings planned for demolition and/or renovation, asbestos containing materials may be encountered. Release of these materials to the environment could result in a significant impact. As indicated in Section 2, above, prior to demolition and during project design, an asbestos survey will be completed before the commencement of construction activities to ensure that any asbestos containing material is appropriately identified. Any remediation plan would be developed and carried out in compliance with all Department of Environmental Health and EPA standards, and would reduce any potential impacts to less than significant.

Operational/Permanent Impacts

The proposed project would include the replacement and reconstruction of student community space and the assembly space and classrooms. These uses would not result in the routine transport, use, or disposal of hazardous materials outside of standard janitorial supplies which are handled, stored, disposed of and generally managed pursuant to SDSU's Environmental Health and Safety standards and protocols. Therefore, once operational, no significant impact would occur.

Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Construction/Temporary Impacts and Operational/Permanent Impacts

A review of regulatory records and historical aerial photographs and topographic maps did not show any evidence on the project site of a hazardous substance or material release. Therefore, it is not expected that workers would encounter impacted soils during grading and construction activities at the project site. As indicated in Section 2, above, adherence to all hazardous materials laws and regulations will prevent an emergency hazardous material situation from affecting the project site.

Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Construction/Temporary Impacts and Operational/Permanent Impacts

The proposed project is located on the SDSU campus. However, there is no evidence that soil or groundwater at the proposed project site has been or would be contaminated. Further, the proposed land uses would not introduce new hazardous emissions or hazardous material sources to the SDSU campus. As indicated above in Section 2, SDSU will adhere to all hazardous materials laws and regulations which would help ensure that all hazardous materials and substances are handled, stored, transported, and disposed of in accordance with SDSU Department of Environmental Health and Safety protocols. Therefore, the proposed project would not result in any impact related to hazardous emissions or hazardous waste release.

Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would create a significant hazard to the public or the environment?

The proposed project site was not located on regulatory databases searched by EDR. As noted above, based on a review of the EDR report, historical topographic maps and aerial photographs, and GeoTracker and EnviroStor databases, there is no information to support a finding that surrounding sites have impacted environmental conditions at the project site that would result in a potential hazardous material or substance release once construction commences. As indicated above, during planning and design, an asbestos, lead-based paint and termiticides evaluation will be performed to determine the presence of any of these substances. Should these substances be discovered, a remediation plan, consistent with the San Diego County Department of Health and the EPA, will be developed and implemented to ensure that all substances are safely handled and disposed. Therefore, the project would result in a less than significant impact.

For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

The proposed project site is not located within an airport land use plan. The closest airport is Montgomery Field, which is located approximately 4.75 miles northwest of the project site.

For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

The proposed project site is not located within the vicinity of a private airstrip. The closest airport is Montgomery Field (public), which is located approximately 4.75 miles northwest of the project site.

Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Construction/Temporary Impacts

SDSU maintains an Emergency Operations Plan that would be implemented in the event an on- or off-campus emergency warrants evacuation of the campus (SDSU 2013). However, this plan only provides instructions for the evacuation of on-campus buildings and does not designate specific roadways as evacuation routes off-campus. The San Diego County Emergency Operations Plan provides designated evacuation routes, with Interstates 5 (I-5) and 8 (I-8) being in closest proximity to the proposed project site (County of San Diego 2014).

Construction of the proposed project would result in a nominal temporary increase in traffic volumes on roadways within close proximity of the project site (See Transportation Impact Analysis, San Diego State University Tula/Tenochca Project, Linscott, Law & Greenspan (LLG 2016).). Heavy vehicles hauling debris from the site would principally utilize Montezuma Road to Fairmount Avenue to access I-8. This route is generally a less-congested route than College Avenue to I-8, and also better accommodates truck traffic. Construction workers commuting to the worksite, as well as other miscellaneous trips in passenger cars and light trucks, would also utilize these roadways, as well as College Avenue.

The proposed project would not cause or result in significant impacts to these street segments (LLG 2016) and would add only a nominal amount of temporary vehicle trips to I-8. These trips would be less than the day-to-day fluctuation of traffic on I-8 and therefore would not adversely affect operations of this designated evacuation route. Therefore, impacts to the adopted emergency response or evacuation plans would be less than significant.

Operational/Permanent Impacts

The proposed project is expected to replace an existing building and its associated uses. As a result, the proposed project would not generate new or additional students, staff or visitors to SDSU. Therefore, operation of the proposed project would not impact an adopted emergency response plans.

Would the project expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

The proposed project site is located within an existing urban area separated from the nearest urban canyon by the substantially sized parking lot and parking structures that line the eastern edge of campus. The proposed project would therefore not result in redevelopment of an area bordered by wildlands that may pose a risk of wildland fire. Therefore, no impact would result.

5.3 Cumulative Analysis

This hazards assessment was conducted for the proposed demolition of the existing Tula Community Center, which would be replaced by the construction of a new Tenochca Community Space and a new Tula Pavilion. A review of regulatory records for the project site did not indicate any current or past uses that would impact environmental conditions at the site. With the proposed design plans outlined in Section 2, the proposed project would not contribute to or result in a cumulative impact relative to hazards and hazardous materials that are known to exist within the project vicinity.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

EXECUTIVE SUMMARY

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 08/01/2016 has revealed that there is 1 CA ENVIROSTOR site within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there is 1 CA UST site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not

EXECUTIVE SUMMARY

limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 41036

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 43899

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.

Amount (Lbs): 16975

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

Violation Citation: Generator has not maintained reusable containers/bins for medical waste storage in a clean and sanitary manner. 118295 and 118305
Activity: ACTIVE

Facility Id: 115140
Update Date: 11/02/2012
Inspection Date: 11/02/2010
Violation Code: 6HV4254
Violation: THERMOM: NO CALIBRATION RECORDS -3YRS
Violation Citation: Generator did not maintain records of annual thermometer calibration checks onsite for at least the past 3 years. 118215(2)(B)
Activity: ACTIVE

Facility Id: 115140
Update Date: 11/02/2012
Inspection Date: 10/23/2003
Violation Code: 6HV0215
Violation: OIL FILTERS IMPROPERLY MANAGED
Violation Citation: Used oil filters not properly drained, stored, or labeled prior to transport for the purpose of metal reclamation. CCR 66266.130
Activity: ACTIVE

Facility Id: 115140
Update Date: 11/02/2012
Inspection Date: 10/23/2003
Violation Code: 6HV4207
Violation: SHARPS IMPROPERLY CONTAINED
Violation Citation: Generator did not store sharps waste in approved and properly marked sharps container. 118285(a)(d)
Activity: ACTIVE

Facility Id: 115140
Update Date: 11/02/2012
Inspection Date: 10/23/2003
Violation Code: 6HV4212
Violation: RED BAGS NOT CONTAINERIZED
Violation Citation: Did not containerize and place red bags in rigid, leak resistant, and covered containers or bins. 118280(b)
Activity: ACTIVE

Facility Id: 115140
Update Date: 11/02/2012
Inspection Date: 10/31/2011
Violation Code: 6HV1009
Violation: HMBP: INADEQUATE SITE MAP
Violation Citation: Business Plan does not have a site map which provides sufficient or complete information for emergency response agencies. HSC 25509(a)(5) & 25505(a)(2)
Activity: ACTIVE

Facility Id: 115140
Update Date: 11/02/2012
Inspection Date: 10/31/2011
Violation Code: 6HV0209
Violation: WASTE ONSITE >90/180/270 DAYS
Violation Citation: Hazardous waste is stored in excess of allowable time period (90 days) without a State permit or written variance. CCR 25201(a) &

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016

	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2016	Telephone: 703-603-8704
Date Made Active in Reports: 10/21/2016	Last EDR Contact: 10/04/2016
Number of Days to Update: 17	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Number of Days to Update: 10	Next Scheduled EDR Contact: 01/30/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 09/02/2016	Last EDR Contact: 09/28/2016

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895

Number of Days to Update: 64	Next Scheduled EDR Contact: 01/09/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895

Number of Days to Update: 93	Next Scheduled EDR Contact: 12/12/2016
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/09/2016	Source: Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map:	5622828 LA MESA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/8 - 1/4 Mile WNW	Not Reported
2	1/2 - 1 Mile SSE	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: REDDING

Soil Surface Texture: gravelly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 5.1
2	14 inches	29 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 5 Min: 4.5
3	29 inches	44 inches	indurated	Not reported	Not reported	Max: Min:	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: OLIVENHAIN

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 6 Min: 5.6
2	9 inches	42 inches	very cobbly clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 5.5 Min: 5.1
3	42 inches	59 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 5.5 Min: 5.1

Soil Map ID: 3

Soil Component Name: REDDING

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Dudek & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 9B60-4BCC-A57F

PO # 10018

Project SDSU Tula Hazards Memo

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 9B60-4BCC-A57F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
